Active Ingredient	Brand Name	Blueberries							Raspberries						
		United States	Canada	Japan	Korea	Taiwan	UK	Hong Kong	United States	Canada	Japan	Korea	Taiwan	UK	Hong Kong
Zeta-Cypermethrin	Mustang	0.8	{0.1} Default	{0.5}	2	2	{0.05} EU	---	0.8	{0.1} Default	{0.5}	2	2	{0.5} EU	---
Ziram	Ziram	7	7	{5}	{5}	{5}	{0.1} EU	10	---						

MRLs in this chart are accurate as of **December 22, 2014**. Please note that MRLs frequently change. Regulatory sources and/or www.MRLDatabase.com should be consulted for the most current MRL information.

Legend and Notes	
{1}	MRL values in brackets and italicized are more restrictive than US values.
3 Regional Tolerance	"Regional Tolerance" indicates a US MRL which is established for pesticide residues resulting from the use of the pesticide pursuant to a regional registration. Such a tolerance is supported by residue data from specific growing regions for a raw agricultural commodity.
5 Time-limited	"Time-limited" indicates a US MRL with a specified expiration date in the legislation.
4 Cod	"Cod" (Codex) or "EU" indicates the source of the MRL.
5*	For Taiwan only--the asterisk indicates that the MRL is set on Taiwan's "Others" crop group which is the Limit of Determination (LOD) for the active ingredient.
{0.1} Default	"Default" indicates a specific national MRL is not established and the country's default MRL is applicable. The EU and Japan maintain a default of 0.01 ppm, while Canada's default is 0.1 ppm.
0.01 Default	
	In cases where there is no US MRL, foreign MRLs are not included.
	All numeric values listed are in parts per million (ppm).
